

# GDPR Strategy & Alignment Courses

## EU GDPR Strategy & Alignment Courses for 2017

### The course objective

Our GDPR Strategy & Alignment courses are designed for people who have already gained an awareness of this subject and now want to understand what this all means to them in practice. More importantly what actions they need to prepare for in the remaining short timeframe to May 2018.

The course is led by subject matter experts who have been involved in GDPR from its conception and responsible for "real world" strategy and alignment programs.

### EU GDPR Strategy & Alignment Courses

2017 Courses are scheduled for the following dates based at in the City of London at TechUK and IET Savoy Place. Registration starts at 09:30 hrs and course finishes at 16:30 hrs. Lunch is provided and after the course free drinks are provided and a chance to network with other participants.

Our data protection courses are the most practical courses available in the market today and aimed at making GDPR easy to understand, where your focus needs to be, setting of priorities and to dispel many of the scare tactics and myths about GDPR.

The duration of the course is two days, delegates can attend either the first and second day or both, depending on their current business processes, data protection and cyber risk & security knowledge.

The course is led by Dai Davis a renown IT lawyer and many years experience in data protection and the cyber security market. The second day course is delivered by David Clarke and Russ Davis who focus on the real security processes implications of GDPR and the technical considerations that need to be scoped.

Many people are aware of greater penalties under the GDPR that can be imposed for breaches. In addition to clarifying such penalties, our subject matter experts will spend as much time on the substantial commercial benefits that can be derived by our clients implementing the new legislation.

### Our GDPR courses include in depth discussions of the following topics:

- The obligation to consider privacy when designing an electronic system
- The obligation to consider privacy by default
- The obligation to notify breaches to the information commissioner
- The obligation to notify breaches to an individual affected
- Right: to object to data collection; to object to data profiling; to be forgotten; to data portability
- A brief history of the Data Protection legislation
- Discrepancies between UK and EU law
- The effect of Brexit on Multinational companies operating in Europe
- Cross-border access to data protected by GDPR
- Data Mapping, Sharing, Use, Transfer, Geographical location
- The need and role for a Data Protection Officer
- The next steps you need to consider for a successful alignment program to meet the GDPR requirements,
- State of the art solutions and appropriate measures to ensure compliance.

### Why you should attend

Many organisation's are now becoming aware of GDPR and are trying to get a steer on how to address the challenges, and yet for many, this is not even on their radar. GDPR is not just about privacy or data protection or legal implications; GDPR is about a **business transformation** leading to a completely new approach on how an organisation is responsible for protected and personal data that they process. GDPR is about harmonization of the different data protection directives in each EU member state, and aligning data protection to the modern technology used by citizens today and the future. For organisations that fail to comply, there will be serious financial penalties in the way of a fine structure.

One of the central principles of the EU GDPR is its enhanced Accountability Principle: "organisations must demonstrate how they have taken appropriate measures to ensure compliance." A simple statement, although in practice an awesome challenge. Nuances of the GPDR need to be addressed specific to your business and operating situation.

## 25<sup>th</sup> May 2018 is when GDPR is in full enforcement

*“over 60% of organisations will not be ready in time”*

### EU GDPR Program Preparation Courses

These courses are run twice per month from September 2017 and are designed to help organisations that need to act fast in setting up a GDPR Program to meet the deadline of 25th May 2018.

| Course | Date                                 |
|--------|--------------------------------------|
| GDPP01 | Thursday 14 <sup>th</sup> September  |
| GDPP02 | Wednesday 27 <sup>th</sup> September |
| GDPP03 | Thursday 12 <sup>th</sup> October    |
| GDPP04 | Wednesday 27 <sup>th</sup> October   |
| GDPP05 | Thursday 9 <sup>th</sup> November    |
| GDPP06 | Wednesday 22 <sup>nd</sup> November  |
| GDPP07 | Thursday 7 <sup>th</sup> December    |
| GDPP08 | Tuesday 19 <sup>th</sup> December    |

### EU GDPR Bespoke Requirements Workshops

These workshops are delivered to organisations at their own location. They serve to give the organisation leadership and direction in how best to address GDPR and to map out a future GDPR strategy and alignment program.

Workshops are priced on a single day basis.

He is a qualified GDPR Practitioners with experience in managing GDPR compliance programs.

#### David Clarke

David is an International Privacy and Information Security professional, specialising in GDPR, who has worked with Global FTSE 100 brand leading companies in Financial Service, Telecoms and cutting edge Technology companies providing vital leadership in information technology to secure and protecting \$billions of valuable information.

### The course academic direction and leadership is under Dr. Christopher Richardson

Dr Richardson is the Academic Director and Principle Investigator coordinating the EU GDPR Education program across the 17 Global Partner Universities. In this role, he provides the ISO 17034 Accredited education assurances to enable issuance of globally recognized CEP credits and the inter-university student exchange programs under the ERASMUS+, RISE and COST -H2020 Education program initiatives.

### On-going learning and support

GDPR is coming soon, but well after the 25 May 2018, organisations will still need ongoing support in the subject of Data Protection and Compliance. To meet the ongoing training and support we offer a CPE Nano Learning environment so that organisations can remain fully briefed about all market developments.
